

Data sheet 100829

Accessories of special worktable of hole system Ø 28

Plugging bolt / Clamping bolt with steel balls Ø 28

Ball clamping bolts, plugging bolts Ø28 with or without clamping function. Ball clamping bolts usable to fix stop angles square or stop angles vertical to table plates Ø28 to achieve defined stop points for fixtures. Different lengths are available to applicate ball clamping bolts also at different plate thicknesses. Ball clamping bolts also available to clamp angle to angle for realising for example vertical elevated support and clamping points.

Examples of use:

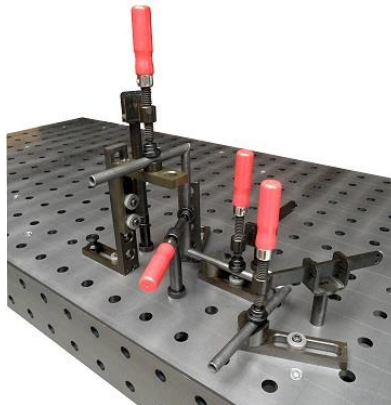

Metal works – At 3D-Welding table for clamping angles and bars to set stops or supports

Woodworks – Clamping stops and supports during gluing of wood constructions

Machine building – Clamp stops and support for treatment of parts on special worktables

Toolshop or Repair – Securing of toolparts with stop angles vertical before treatment or transportation within shop

Gen. Industrie - In maintenance departments secure modules or parts during treatment

Description

Plugging bolt

Type-no.: 101120
Dimensions: 85mm x Ø 28mm
Weight: 0,4kg
full steel and zinc coated black

Clamping bolt with steel balls 22,5

Type-no.: 100829
Dimensions: 45mm x Ø 28mm
Gewicht: 0,3kg
for plate height 16

Clamping bolt with steel balls 41,5

Type-no.: 100827
Dimensions: 50mm Ø 28mm
Weight: 0,3kg
for clamps, bars and angles

Clamping bolt with steel balls 56,6

Type-no.: 100825
Dimensions: 65mm Ø 28mm
Weight: 0,4kg
for plate height 35
