

Plug holder/ Clamp holder Ø 28

Holder Ø28 enabling the preadjustment of the plugin height of standard clamps. The preadjustment keeps the clamps at ist height even the clamping force is released. After exchange of the work pieces the reclamping time is improved. All parts are zinc coated black.

Anwendungsbeispiele:

Metallbau – an 3D-Schweißstischen Ø28 zur Spannung von Schweißkonstruktionen

Holzverarbeitung - Spannung von Leimkonstruktionen an Systemtischen SST, SWT

Maschinenbau – Halten von Werkstücken an Zurichtstischen , Montagearbeitsplatz

Werkzeugbau - Spannung von Werkzeugteilen zur Anpassung, Montage

Industrie allg. - Befestigung von Aufspannvorrichtungen, in Instandhaltungsabteilung
Gegenstände bei der Reparatur sichern

Description

Plug holder / bold adapter

Type-no: 101110

Ø 28mm inside

Ø 38mm outside

with knurled outside for a good grip

Weight: 0,1kg

Clamping tool adjustment help. The plug holder just be slided at the clamp bar. The plug holder prevent the clamping tool from sliding into the plate if clamp force gets relieved. So the clamp keeps its ideal height position for reclamping the next piece again. Plug holder also beeing used to adapt ball clamping bolts of 35mm plates to usable bolts to connect 2 stop angles to each other by sliding the plug holder onto the clamping bolt and so adapting the length difference.
