

Data sheet 101170

Accessories of special worktable of hole system Ø 28

TEMPUTEC

Clamp bar connector/ Clamp extension tube Ø 28

Extension accessories for Temputec standard clamps are applicable to enlarge the clamping height of standard clamps up to 400mm. The Extension Tube connector is coupling the main clamp tube with the extension tube itself. Extension tubes also available in overlenghts on request.

Examples of use:

Metal works – At 3D-Welding table Ø28 for clamping of higher welding constructions

Woodworks – Clamping of large pieces of wood constructions for gluing at system tables SST, SWT Ø28

Machine building – Fixing high items during treatment on special worktables Ø28

Gen. Industrie - Maintenance, clamp large machine parts during treatment
