

Adapter Ø 28

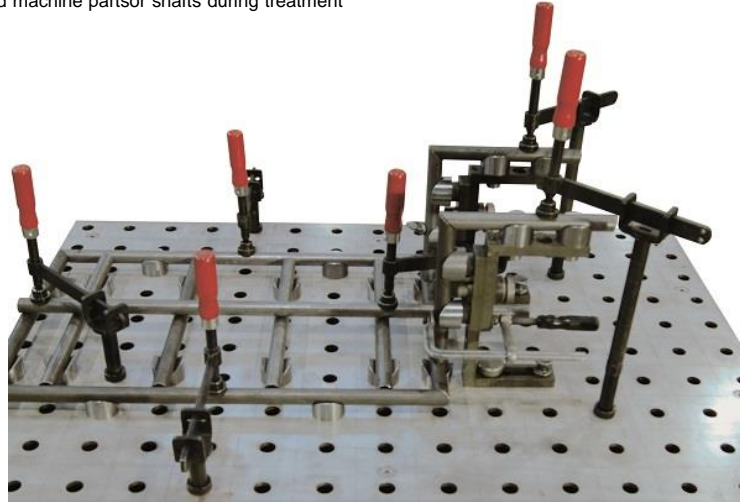

Adapters enable the adaption of different clamping heights caused by joining different diameters in the middle. The clamping prism can get elevated by using a matching height adapter especially for smaller diameter round materials.

Examples of use:

Metal works – At 3D-Welding table Ø28 for height adaption of prism when clamping round profiles

Machine building – support for items during treatment on special worktables Ø28

Gen.Industrie - Maintenance, support for round machine parts or shafts during treatment

Description

Adapter 50

Type-no.: 101190
Dimensions: 50mm x Ø 28mm
Weight: 0,3kg
full steel and zinc coated black

Adapter 70

Type-no.: 101195
Dimensions: 70mm x Ø 28mm
Weight: 0,6kg
full steel and zinc coated black

Adapter 100

Type-no.: 101198
Dimensions: 100mm x Ø 28mm
Weight: 0,8kg
full steel and zinc coated black
