

**Universal trolleys for Standard parts and Assembling Ø28**

Assembling and welding work often require a variety of small standard items which should be hold available close at the place of operation. Mobile and flexible assembling trolleys provide an ideal solution with its capability to hook in multiple sizes of stock boxes as well as provide the opportunity to assemble a tooling carriage board on ist top. The selection of needed standard parts and tools can be arranged direct at the storeroom prior work. After completion of the individual task the trolley can be emptied and become rearranged as needed for the next task.

The modular TEMPUTEK trolleys can be modified individually and are offered in two standard versions as Standard Parts Trolley and Assembling Trolley. The full metallic constructions in standard are zink coated but also available in individual colors upon request. For ideal positioning at the workstation all trolleys are kept movable by while based on 4 turnable wheels. Additional information can be reviewed at [www.temputek.de](http://www.temputek.de)
